

*From this course I have learned a lot of things and developed my writing skills.*

*I have learned strategies for reading, drafting, revising, and editing from the work done. We were to look at the author's background and the place he worked at the magazine it was published which served to get a deeper connection.*

*With the help of our professor I got the better hang of practising systematic application of citation conventions.*

The assignments throughout the course have helped me massively on developing strategies for reading, drafting, revising, editing, and self-assessment as how before i was not as careful and didnt pay that much attention but now i'm more better at the structure of an essay.

As well the development and engaging in the collaborative and social aspects of writing processes helped me as how when a peer checked my work and pointed out something was off it helped me rebuild and strengthen my essay.
